

DORIS FRANK

Nigeria | udorisfrank@gmail.com | [LinkedIn](#) | [Portfolio](#)

Versatile Business Analyst with over 7 years of experience delivering data-driven insights, process improvements, and technology-enabled solutions across healthcare, engineering, and corporate sectors. Proven track record in Agile environments, skilled in gathering and documenting requirements (BRDs, PRDs, user stories), facilitating workshops, and aligning technical solutions with business goals to reduce rework and accelerate delivery. Expertise in data analysis and visualization using Power BI, Excel (VLOOKUP, PivotTables, Power Query), and SQL, enabling leadership to make informed strategic decisions. Adept at process mapping (Visio, Lucidchart), KPI tracking, and variance analysis, with measurable success in reducing operational bottlenecks, improving reporting efficiency, and driving revenue growth. .

TECHNICAL SKILLS

- **Project Management & Collaboration:** JIRA, Azure DevOps, Confluence
- **Documentation & Analysis:** BRD, PRD, UAT, RACI Matrix
- **Process Mapping & Visualization:** Microsoft Visio, Lucidchart
- **Cloud & Collaboration Tools:** Microsoft Windows Server, Google Suite, Microsoft Office Suite, Slack, Zoom, Team Viewer

CORE COMPETENCIES

- Requirements Gathering
- Stakeholder Management
- Data Analysis
- Process Improvement
- Business Process Mapping
- Gap Analysis
- Workflow Optimization
- User Stories
- Business Requirements Document
- Functional Specifications
- Change Management
- Customer Journey Mapping
- Business Strategy
- Agile Transformation
- Continuous Improvement

PROFESSIONAL EXPERIENCE

Business Analyst

Amdari Inc.- UK

June 2024 - Present

- Leveraged collaboration tools (Slack, Zoom, TeamViewer) and project management platforms (Jira, Trello) to streamline communication across distributed teams, improving project status visibility and reducing update delays by 25%.
- Partnered with development teams to ensure a precise understanding of business requirements, providing clarifications during sprints and actively contributing to UAT and QA testing, which reduced defect leakage by 15%.
- Defined and tracked project KPIs through Power BI dashboards and Excel variance analysis, enabling leadership to measure solution performance and achieve a 20% improvement in decision-making speed.
- Authored comprehensive Business Requirements Documents (BRDs), capturing both functional and non-functional requirements, which minimized scope creep and improved stakeholder alignment by 30%.
- Compiled and refined user stories with acceptance criteria in Jira, ensuring seamless collaboration between business stakeholders and developers, increasing sprint success rate by 18%.

- Conducted gap analysis and created process maps (Visio, Lucidchart) to identify inefficiencies, leading to a 10% reduction in operational bottlenecks.
- Facilitated cross-functional workshops to align project objectives with business strategy, improving stakeholder satisfaction scores and accelerating requirement sign-off cycles by 20%.

Business Analyst - Hybrid
Franson Engineering, Lagos State
2023 - March 2024

February

- Strengthened financial security and compliance by implementing strict revenue and expense control measures, reducing discrepancies by 25% annually and safeguarding company assets.
- Collaborated with cross-functional leadership teams to develop standardized revenue goals and policies, leading to a 15% increase in company revenue and stronger alignment with strategic objectives.
- Performed monthly bank reconciliations for 500+ vendor accounts, achieving 100% accuracy, resolving financial deviations, and improving vendor relationships and operational efficiency.
- Utilized Excel (VLOOKUP, PivotTables, Power Query) and Power BI dashboards to compare forecasts against financial statements, generating actionable variance analysis reports that informed executive decision-making.
- Designed and implemented a change request triage system that reduced ticket queues by 30%, streamlined workflows, and enhanced service delivery.
- Gathered, documented, and analyzed business requirements to support process improvements and digital transformation initiatives, ensuring project deliverables met stakeholder expectations.
- Partnered with IT and operations teams to monitor KPIs, track business performance metrics, and provide insights that guided budget adjustments and resource allocation.

Business Analyst - Remote
St Martins Hospital, Rivers State, Nigeria
September 2019 - January 2023

- Designed, developed, and monitored interactive dashboards and KPI scorecards in Power BI and Excel, enabling executives and department heads to track hospital performance and align with strategic goals.
- Conducted end-to-end data analysis on clinical and administrative datasets, delivering actionable insights that optimized patient services, reduced inefficiencies, and guided long-term hospital planning.
- Partnered with stakeholders to translate business requirements into technical solutions, building automated reporting frameworks and interactive dashboards that reduced manual reporting time by 40%.
- Leveraged SQL/MySQL queries and data modeling techniques to analyze patient flow, appointment trends, and financial performance, contributing to a 21% increase in service uptake and a 14% reduction in operational costs.
- Performed market research and patient data reviews to identify service demand gaps, leading to the design of new tailored healthcare packages that boosted patient satisfaction scores.
- Collaborated with cross-functional teams (medical, finance, operations, IT) to deliver over 150 interactive visualizations and reports, highlighting service utilization, patient care trends, and cost-saving opportunities.

SELECTED PROJECTS

Full case studies and evidence at the portfolio link above.

- **EcoGrow** (Business Analysis Engagement, Jira, Confluence, Power BI): end-to-end BA/BI engagement translating a product brief into governed requirements, backlog, and sprint delivery; traced 9 requirements to 7 evidenced user stories and scoped a 6-capability future-state roadmap with risk-calibrated governance gates.
- **CoffeeCo** (Business Intelligence Analysis, BrewPulse framework, SQL, Excel, Power BI): sales and operations analysis for a 3-location specialty coffee chain; explained a 72.3% revenue growth

differential, classified 29 products by commercial value, and flagged a 34.5% revenue concentration risk.

- **RevampBank** (Mobile Banking Transformation, Stakeholder Register, RACI, Power-Interest Matrix): led project initiation and governance design for a UK digital bank mobile app revamp; built a 9-role governance framework addressing \$2M in annual revenue exposure.
- **NovaMart** (Customer and Product Insight Optimization, PostgreSQL, Power BI, DAX): BI engagement for a 6-city Nigerian commerce business; built an 11-query SQL Insight Library and 5-page Power BI dashboard, analysing 161.46M naira in revenue and identifying 18.6M naira in recovery opportunity.
